

HIA

Seminar

Tuesday, October 28, 2003

8:00 AM to 10:30 AM - Sheraton Long Island (LIE Exit 53)

Sponsored by: **ComputerMasters, Ltd.**
Smith Barney

Too Much Inventory? Not Enough?

Inventory & Warehouse Management Fundamentals

Learn how to reduce carrying costs of inventory and increase operational productivity, inventory accuracy, and customer satisfaction.

Topics of Discussion:

- How to have the right product and quantity at the right location at the right time
- Warehouse Management: configuration and transactions
- Challenges and advantages of mobile computing in the supply chain environment
- Selecting the right inventory and warehouse management software

Who Should attend? Managers and employees who deal with inventory at any point in the product cycle, from purchasing and manufacturing through the warehouse to sales and shipping.

***All attendees will receive a 50-page "Beginners Reference to Bar Code Labeling" guide.**

Presented By:

Ed Avizur - A. B. Computer Systems – Ed has 15 years of experience in implementing accounting, inventory, warehouse management and manufacturing software for fortune, mid-size and small companies nationwide.

Gil Bautista - Symbol Technologies – Gil has 23 years of experience in supply chain logistics consulting and supply chain integration innovations.

Robert Curtis - Sigman/Kaiden Consultants – Robert is an Industrial Engineer who has 25 years of experience in manufacturing, operations and warehouse management.
